

Pointer #3: Live Streaming Process

Client's Feedback: How are we live streaming? Will there be a request similar to scoring? Can a request be sent to live stream the game to any account? Many times, parents use players' phones to live stream from their accounts.

Development Team's Question: Is this related to live game score updates or the Phase 2 live streaming module?

Client : This is regarding Live Stream.

Pointer #7: Player Position Selection

Client's Feedback: The scorekeeper must be able to choose the position of players in the game (Positions 1-9: Pitcher, Catcher, 1st Base, etc.).

For every defense position there is a number that corresponds with it

pitcher - 1

Catcher- 2

1st baseman- 3

2nd baseman- 4

3rd baseman- 5

Short stop- 6

Left field- 7

Center field- 8

Right field- 9

Development Team's Question: Can you elaborate? The fan (scorekeeper) already fills in the lineup before starting the game.

Pointer #18: Player Substitutions

Client's Feedback: Players need to be clickable so they can be switched out during gameplay.

Development Team's Question: Kindly explain the switch scenario.

Example 1- lets say the tigers are on defense and they want to make a pitching change before the inning is over. We need to be able to click on the player and sub them out. Which means a player from the sub list would go in and pitch.

Example 2- lets say the tigers are on defense and they want their center fielder (8) to go pitch. We need the additional option of changing positions for the players. HOWEVER, the batting lineup doesnt change it defenses changes are being made, they will still hit in the same order. The only time the batting order changes is if a player from the sub list comes in the game.

Pointer #2: Team Profile & Searchability

Client's Feedback: When creating a team profile, the coach adds both their name and the team name. The team name should be displayed on the profile and used for search.

Development Team's Question: Should the team name reflect on the coach's profile? Also, the search function currently supports players, not teams.

There is no coaches profile. There is a team profile that is managed by a coach. The team name is the one that is displayed and be searched.

Pointer #4: Captioning Photos

Client's Feedback: When posting a picture, users should be able to add a caption.

Development Team's Question: Is this related to social media posts?

Yes players, fans, and recruiters should be able to caption their photos and videos just like any other social media post.

PAY- when i downloaded commit off the app store their wasnt a payment page. I already added my payment info in the apple dev account so thats not an issue.
